Intensity Note: Intensity of effort was again solid for this game as there were 10 players over 105% of their personal average for SupraMax efforts and only 3 players were below 90% of their personal average. Further, several lines of evidence not shown in this report (see attachments) show this game was one of the higher efforts of the past several weeks.

Highlighted Players –Intensity Bands Ranked Primarily by SupraMax Efforts Relative to Personal Average (Greater than 105%).

Colten Ellis led with the highest Supra Max Efforts (Rank 1, 173.61%). His Total Supra Max Efforts were in the low-range (Rank 19, 1.3%). As can be seen, this game consisted of quite high number of SupraMax efforts relatively speaking for Ellis.

Jason Zucker had a high Avg Supra Max Efforts (Rank 2, 121.51%). His Total Supra Max Efforts were in the mid-range (Rank 5, 6.8%). This was despite the fact that his CTL is rather low and fatigue was a concern in the near term. Fatigue doesn't appear to be a factor as of yet.

Josh Doan had a high Avg Supra Max Efforts (Rank 3, 121.07%). His Total Supra Max Efforts were also high (Rank 2, 7.1%).

Owen Power had a high Avg Supra Max Efforts (Rank 4, 116.89%). His Total Supra Max Efforts were highest on the team (Rank 1, 7.7%).

Rasmus Dahlin had a high Avg Supra Max Efforts (Rank 5, 112.79%). His Total Supra Max Efforts were similarly high (Rank 4, 7.0%).

Zach Benson had a mid-range Avg Supra Max Efforts (Rank 6, 112.25%). His Total Supra Max Efforts were also in the mid-range (Rank 6, 6.6%).

Josh Norris had mid-range Avg Supra Max Efforts (Rank 7, 111.82%). His Total Supra Max Efforts were in the mid-range (Rank 9, 6.1%).

Tage Thompson had mid-range Avg Supra Max Efforts (Rank 8, 110.74%). His Total Supra Max Efforts were in the mid-range (Rank 10, 5.9%).

Ryan McLeod had a mid-range Avg Supra Max Efforts (Rank 9, 105.92%). His Total Supra Max Efforts were in the lower range (Rank 13, 5.4%).

Bowen Byram had a low mid-range Avg Supra Max Efforts (Rank 10, 105.18%). His Total Supra Max Efforts were in the high range (Rank 3, 7.0%).

Load Note: Although the game schedule has been compressed, the days off have left the top 10 "relatively" fresh considering the amount of games played recently. That being said, there are several players who are exhibiting both flagged negative Freshness 7day and Freshness 3day. These players are highlighted with "***" in the narrative below. Fatigue may be an issue for these players as the games in this compressed period.

Highlighted Players by Most Negative Freshness 3Day- (Fatigue MAY be an issue in the near term)

****Jason Zucker** had the lowest Freshness 3day, indicating the highest freshness (Rank 1, -71.07). His Total Day DTL was high (Rank 4, 237.15), and his Game Only DTL was the highest (Rank 1, 193.47). As noted in the previous section, although his freshness is quite negative, he still produced high time at SupraMax efforts both relative to him himself and as a percentage of total team effort. So, it may be that he will not succumb to fatigue and his CTL will rise enough to support these efforts.

****Colten Ellis** ranked second for Freshness 3day (Rank 2, -68.34), indicating very high freshness. His Total Day DTL was the highest (Rank 1, 272.11), and his Game Only DTL was very high (Rank 2, 192.68).

****Josh Norris** ranked third for Freshness 3day (Rank 3, -46.38), indicating very high freshness. His Total Day DTL was in the upper mid-range (Rank 9, 220.86), and his Game Only DTL was in the upper mid-range (Rank 8, 171.23).

Rasmus Dahlin ranked fourth for Freshness 3day (Rank 4, -38.81), indicating high freshness. His Total Day DTL was high (Rank 6, 234.64), and his Game Only DTL was high (Rank 4, 181.29).

****Jacob Bryson** ranked fifth for Freshness 3day (Rank 5, -38.35), indicating high freshness. His Total Day DTL was in the lower mid-range (Rank 15, 196.92), and his Game Only DTL was in the lower mid-range (Rank 15, 155.80).

Tagge Thompson ranked sixth for Freshness 3day (Rank 6, -38.26), indicating high freshness. His Total Day DTL was high (Rank 3, 238.64), and his Game Only DTL was in the upper mid-range (Rank 7, 175.95).

****Zach Metsa** ranked seventh for Freshness 3day (Rank 7, -37.75), indicating high freshness. His Total Day DTL was in the mid-range (Rank 11, 205.83), and his Game Only DTL was in the lower mid-range (Rank 13, 159.27).

Mattias Samuelsson ranked eighth for Freshness 3day (Rank 8, -37.01), indicating high freshness. His Total Day DTL was high (Rank 8, 225.51), and his Game Only DTL was high (Rank 5, 180.68).

Owen Power ranked ninth for Freshness 3day (Rank 9, -35.40), indicating high freshness. His Total Day DTL was very high (Rank 2, 240.08), and his Game Only DTL was very high (Rank 3, 189.02).

****Jordan Greenway** ranked tenth for Freshness 3day (Rank 10, -33.13), indicating high freshness. His Total Day DTL was the lowest (Rank 19, 166.95), and his Game Only DTL was low (Rank 18, 118.37). Greenway appears to be struggling again and will be addressed in a separate presentation.

Zach Benson ranked eleventh for Freshness 3day (Rank 11, -32.66), indicating mid-range freshness. His Total Day DTL was high (Rank 5, 235.29), and his Game Only DTL was in the upper mid-range (Rank 11, 165.82).

Intensity Band Distribution by Period

In terms of SupraMax efforts, the first period was quite high for several players. So, the first period ended up being 108% of the game average. The second and third periods were lower, but roughly equal (95% and 97%, respectively). These periods weren't necessarily "low", but lower due to the individual players who were extraordinarily high in the first period.

this game was much more balanced than the last few games. The first period was still the highest, (102%), but it was not dramatically higher than the second period, which was approximately the average effort for the entire game (99.7%). Similarly, although the third period was the lowest, it was only marginally lower than the average for the entire game at 98%.
