Intensity Note: In contrast to 12/31 game, which was generally high in intense efforts on a team level, there was much higher variation on 1/3. There were 7 players who displayed SupraMax efforts greater than 105% of their personal average. In particular, UPL exhibited an enormous 285% greater than his personal average. But at the same time, there were 9 players who displayed efforts less than 95% of their personal average. So, as a team, a very uneven effort. Relative to the other games in the month of December, this was the lowest effort in terms of SupraMax efforts and Very High Intensity efforts since December 8th. As noted at the end of this report, several players had high efforts in the first period, but it was very uneven and as a team, it was low.

Highlighted Players –Intensity Bands Ranked Primarily by SupraMax Efforts Relative to Personal Average (Greater than 105%).

Ukko-Pekka Luukkonen led with the highest Supra Max Efforts (Rank 1, 285.31%). His Total Supra Max Efforts were the lowest (Rank 19, 0.9%).

Josh Doan ranked second for Supra Max Efforts (Rank 2, 117.31%). His Total Supra Max Efforts were very high (Rank 3, 7.2%).

Zach Benson ranked third for Supra Max Efforts (Rank 3, 116.86%). His Total Supra Max Efforts were very high (Rank 2, 7.5%).

Bowen Byram ranked fourth for Supra Max Efforts (Rank 4, 110.66%). His Total Supra Max Efforts were the highest (Rank 1, 7.8%).

Peyton Krebs ranked fifth for Supra Max Efforts (Rank 5, 107.68%). His Total Supra Max Efforts were high (Rank 5, 6.7%).

Josh Norris ranked sixth for Supra Max Efforts (Rank 6, 106.52%). His Total Supra Max Efforts were high (Rank 7, 6.3%).

Jacob Bryson ranked seventh for Supra Max Efforts (Rank 7, 105.31%). His Total Supra Max Efforts were in the lower mid-range (Rank 14, 4.4%).

Load Note: As a whole, as a team, players were relatively fresh for this game. Given the day off and practice the day before, with no morning skate, Freshness metrics were bordering on “too fresh”, but were not to that point. The team should have been in a good spot going into this game. This seems supported by the nature of the 9 players who were above 105% of their average and had good intensity. After the game, there are only two players “flagged” with low 3 Day Freshness and that flag is “yellow”, which should not be of concern. So, again, the team still seems relatively fresh on the whole. That being said, the upcoming game schedule will be of concern and having higher freshness to start that game sequence is probably advantageous.

Also of note, since there was no morning skate, the total day and game only DTL metrics will be the same for 1/3.
