

Game Report (1/15/26) – Intensity Band Metrics

Player SupraMax Efforts as Percentage of Team Total

PLAYER_NAME	Total Supra Max Efforts
Bowen Byram	8.2%
Rasmus Dahlin	7.8%
Mattias Samuelsson	7.2%
Jack Quinn	6.6%
Noah Ostlund	6.3%
Josh Doan	6.2%
Zach Benson	6.1%
Tage Thompson	6.0%
Owen Power	5.9%
Alex Tuch	5.9%
Ryan McLeod	5.8%
Peyton Krebs	5.0%
Jason Zucker	4.8%
Tyson Kozak	4.1%
Jordan Greenway	4.0%
Beck Malenstyn	3.4%
Zach Metsa	3.0%
Jacob Bryson	2.5%
Colten Ellis	1.1%

Player SupraMax/VHI Efforts Relative to Player Personal Average

PLAYER_NAME	Supra Max Efforts	Very High Intensity Efforts
Colten Ellis	131.25%	141.08%
Noah Ostlund	118.44%	123.75%
Rasmus Dahlin	118.20%	113.98%
Bowen Byram	115.15%	107.52%
Jack Quinn	114.68%	111.97%
Ryan McLeod	109.77%	111.15%
Tage Thompson	105.93%	106.21%
Jordan Greenway	103.22%	94.21%
Josh Doan	98.94%	100.36%
Alex Tuch	97.73%	97.24%
Zach Benson	97.58%	98.47%
Mattias Samuelsson	96.64%	95.81%
Tyson Kozak	94.23%	93.30%
Owen Power	85.54%	91.96%
Beck Malenstyn	83.85%	83.98%
Jason Zucker	80.43%	85.24%
Peyton Krebs	78.23%	79.74%
Zach Metsa	75.10%	73.42%
Jacob Bryson	67.25%	65.61%

Intensity Note: Overall, although in terms of absolute SupraMax effort, this game was not impressive. It was 95% of average for the team, even after taking out Bryson and Metsa. But in context, it was the second game of a back-to-back. So, there was an approximate 5% drop in SupraMax efforts compared to the 1/14 game, which is to be expected with back-to-back games. Importantly, though the third period efforts were actually higher than the 1/14 game. Additionally, as of tonight, the top 10 had the most negative Freshness 7 day as a group since Dec 9. (More on that in the load section). All of these factors taken into account, it should be considered a solid effort. The players highlighted below had SupraMax efforts greater than 105% of their personal average. It should be noted that of the highlighted skaters (excluding Ellis), four of the six have the highest CTLs on the team. The highest CTL is Power and he was quite low at 85% of his personal average. This indicates his workload may be too high and needs to be reduced (e.g. skills, morning skates) to get better explosive performance from him.

Highlighted Players –Intensity Bands Ranked Primarily by SupraMax Efforts Relative to Personal Average (Greater than 105%).

Colten Ellis led with the highest Supra Max Efforts (Rank 1, 131.25%). His Total Supra Max Efforts were the lowest (Rank 19, 1.1%).

Noah Ostlund ranked second for Supra Max Efforts (Rank 2, 118.44%). His Total Supra Max Efforts were high (Rank 5, 6.3%).

Rasmus Dahlin ranked third for Supra Max Efforts (Rank 3, 118.20%). His Total Supra Max Efforts were very high (Rank 2, 7.8%).

Bowen Byram ranked fourth for Supra Max Efforts (Rank 4, 115.15%). His Total Supra Max Efforts were the highest (Rank 1, 8.2%).

Jack Quinn ranked fifth for Supra Max Efforts (Rank 5, 114.68%). His Total Supra Max Efforts were high (Rank 4, 6.6%).

Ryan McLeod ranked sixth for Supra Max Efforts (Rank 6, 109.77%). His Total Supra Max Efforts were high (Rank 11, 5.8%).

Tage Thompson ranked seventh for Supra Max Efforts (Rank 7, 105.93%). His Total Supra Max Efforts were high (Rank 8, 6.0%).

Game Report – Load Metrics

NAME	DTL	CTL	Freshness		Game Only DTL
			(7 day)	(3day)	
Colten Ellis	258.98	81.34	-39.64	-76.46	197.14
Ryan McLeod	194.07	101.91	-24.02	-50.65	194.07
Noah Ostlund	175.11	90.00	-29.56	-52.86	175.11
Bowen Byram	174.92	101.75	-19.82	-39.26	174.92
Rasmus Dahlin	173.77	100.25	-25.16	-45.80	173.77
Mattias Samuelsson	172.53	100.31	-24.37	-44.42	172.53
Tage Thompson	171.53	105.28	-24.38	-45.56	171.53
Tyson Kozak	167.27	74.90	-23.43	-62.13	167.27
Josh Doan	165.88	99.71	-16.99	-30.56	165.88
Jack Quinn	165.75	106.96	-10.60	-22.59	165.75
Owen Power	162.93	108.61	-26.86	-49.93	162.93
Alex Tuch	156.94	96.56	-22.10	-41.49	156.94
Jason Zucker	156.65	71.15	-44.34	-66.24	156.65
Zach Benson	156.45	95.86	-25.97	-45.40	156.45
Jordan Greenway	153.01	81.89	-25.61	-34.92	153.01
Peyton Krebs	150.28	93.97	-19.95	-35.47	150.28
Beck Malenstyn	140.22	100.59	-23.39	-39.82	140.22
Zach Metsa	134.33	90.04	-28.41	-41.47	134.33
Jacob Bryson	124.55	80.15	-25.61	-40.57	124.55

Highlighted Players by Most Negative Freshness 3Day- (Players noted with Freshness 3Day below negative 45) Fatigue **MAY** be an issue in the near term)

Colten Ellis had the lowest Freshness 3day, indicating the lowest freshness (Rank 1, -76.46). His Total Day DTL was the highest (Rank 1, 258.98), and his Game Only DTL was also the highest (Rank 1, 197.14).

*****Jason Zucker** ranked second for Freshness 3day (Rank 2, -66.24), indicating very low freshness. His Total Day DTL was in the lower mid-range (Rank 13, 156.65), and his Game Only DTL was in the lower mid-range (Rank 13, 156.65). As has been pointed out previously, Zucker's low CTL was of concern through this condensed stretch of games. His SupraMax efforts increased consistently from Jan 6 through Jan 12 (4 games) where they were the highest. Jan 14 and 15 they've progressively decreased such that Jan 15 was actually lower than Jan 6, his first day back. So, it is likely fatigue is becoming an issue. w

Tyson Kozak ranked third for Freshness 3day (Rank 3, -62.13), indicating very low freshness. His Total Day DTL was high (Rank 8, 167.27), and his Game Only DTL was high (Rank 8, 167.27).

Noah Ostlund ranked fourth for Freshness 3day (Rank 4, -52.86), indicating very low freshness. His Total Day DTL was high (Rank 3, 175.11), and his Game Only DTL was high (Rank 3, 175.11).

Ryan McLeod ranked fifth for Freshness 3day (Rank 5, -50.65), indicating very low freshness. His Total Day DTL was very high (Rank 2, 194.07), and his Game Only DTL was very high (Rank 2, 194.07).

****Owen Power** ranked sixth for Freshness 3day (Rank 6, -49.93), indicating very low freshness. His Total Day DTL was in the mid-range (Rank 11, 162.93), and his Game Only DTL was in the mid-range (Rank 11, 162.93). As noted in the intensity section, Power has the highest CTL on the team, in large part due to the extra work he does (e.g. skills, morning skates), but was low in SupraMax efforts, especially compared to the other high CTL players who were all the highest SupraMax values. Therefore, it is possible Power is doing too much and that is detracting from his high power efforts.

Rasmus Dahlin ranked seventh for Freshness 3day (Rank 7, -45.80), indicating low freshness. His Total Day DTL was high (Rank 5, 173.77), and his Game Only DTL was high (Rank 5, 173.77).

Tage Thompson ranked eighth for Freshness 3day (Rank 8, -45.56), indicating low freshness. His Total Day DTL was high (Rank 7, 171.53), and his Game Only DTL was high (Rank 7, 171.53).

Zach Benson ranked ninth for Freshness 3day (Rank 9, -45.40), indicating low freshness. His Total Day DTL was in the lower mid-range (Rank 14, 156.45), and his Game Only DTL was in the lower mid-range (Rank 14, 156.45).

Load note: As mentioned in the Intensity section, Freshness is relatively low for the top ten. Since their CTL is getting so high, it turns out the ATL (acute training load), which is a proxy for the load over the past 7 days is actually the highest it's been all season. So, again, during this compressed stretch, fatigue may become a factor if ATL climbs anymore.

Intensity Band Distribution by Period

PLAYER_NAME	Period1	Period2	Period3
	Avg Supra Max Efforts	Avg Supra Max Efforts	Avg Supra Max Efforts
Zach Metsa	205.56%	88.89%	5.56%
Jason Zucker	134.08%	46.93%	118.99%
Peyton Krebs	130.00%	123.33%	46.67%
Owen Power	128.18%	90.00%	81.82%
Beck Malenstyn	124.22%	96.09%	79.69%
Josh Doan	123.61%	74.68%	101.72%
Jordan Greenway	117.57%	85.14%	97.30%
Alex Tuch	110.96%	101.37%	87.67%
Ryan McLeod	110.38%	80.66%	108.96%
Tyson Kozak	109.27%	113.25%	77.48%
Jacob Bryson	103.30%	96.70%	
Colten Ellis	100.00%	83.33%	116.67%
Tage Thompson	97.74%	81.45%	120.81%
Mattias Samuelsson	95.51%	113.48%	91.01%
Noah Ostlund	95.28%	119.74%	84.98%
Zach Benson	92.41%	105.80%	101.79%
Bowen Byram	90.10%	114.85%	95.05%
Jack Quinn	84.68%	124.60%	90.73%
Rasmus Dahlin	80.77%	101.75%	117.48%
Average	107.44%	98.49%	93.75%

Intensity Band Distribution by Period

As with several recent games, this game was relatively front loaded regarding SupraMax efforts. This is somewhat biased by Metsa who had a very high first period effort, but didn't play much, if at all in the third. So, even taking Metsa and Bryson out who also didn't play much in the third, the first period average comes down to 105% of the game average and the second and third are 98 and 96%, respectively. So, maybe not as front loaded as it appears, but to some extent. The question is, the third period drop-offs a function fatigue/fitness or non-physiological factors?
